EnduRail-Modular Aluminium Handrails.....

Handrails are first line of fall protection system against Drowning Hazards for STP/WTP. OSHA / EN / ASTM Compliant Handrails with Smooth finish and high on Aesthetics imparts it's use by employee during regular commute and at the time of egress, highly reducing chances of accidents. EnduRail carved out of Marine Grade high strength AA 6082T6 alloy and LM 25TF grade **Structural Aluminium Fittings** remains smooth and healthy for much longer tenure than conventional GI/SS 304 Handrails. Natural characteristic of Aluminium to resist Atmospheric Corrossion between pH 4 to 10.5 with light weight and 100% Modularity (No Welding)makes it an ideal choice for STP/WTP.

1

+100,000 METER

Installed across 12 countries Worldwide

2

+60,000 METER

Installed within STP/WTP Plants - Including UAE, Saudi Arabia, Qatar, Singapore

3

LOWEST IN LIFE CYCLE COST

Load/Design Compliance

OSHA & EM
ASTM Test Codes
NBC of India 2016

Aluminum Alloy

Marine Grade Alloy
Corrosion Resistant
Long lasting Lowest in life cycle cost
